

Living things and their habitats

Step 1 Habitats in my local area

mammal – an animal with fur/hair

bird – an animal with feathers, wings and a beak

deciduous tree – a tree that loses its leaves during autumn

evergreen tree – a tree that keeps its leaves all year round

habitat – a place where an animal or plant lives

Step 2 Polar Habitats

carnivore – an animal that eats other animals

herbivore – an animal that eats plants

Arctic plants – plants that grow in the Arctic

habitat – a place where an animal or plant lives

hibernate – to spend a long period of time in a deep sleep

Step 3 Desert Habitats

reptile – an animal with dry scales

cactus – a plant with spines

desert – an area often covered in sand with very little rainfall

habitat – a place where an animal or plant lives

rainfall – the amount of rain that falls in one place

Step 4 Ocean Habitats

ocean – a large area of seawater

fish – an animal that lives in water which usually has fins, scales and gills

mammal – an animal with fur or hair on its body

seagrass – a plant that grows and lives in the water

Step 5 Woodland Habitats

woodland – a large area with trees, shrubs and other plants

fern – a plant with long stems and feather-like leaves

mammal – an animal with fur or hair on its body

bird – an animal with feathers, wings and a beak

moss – a plant that grows in damp conditions

Step 6 Microhabitats

microhabitat – a very small habitat

insect – a small animal that has six legs

Step 7 Habitats and diet

carnivore – an animal that eats other animals

herbivore – an animal that eats plants

omnivore – an animal that eats other animals and plants

Step 8 Food Chains

food chain – the order in which energy is passed from one plant or animal to another when they are eaten

Step 9 Living, dead or never alive?

living – something that is alive

dead – something that was once living but is now not alive

never alive – something that has never been living
