

Science Knowledge Organiser

Animals Including humans

Facts:

We have 5 senses.

We use our eyes to see.

We use our nose to smell.

We use our ears to hear.

We use our tongue to taste.

We use our hands to touch.

Vocabulary

human	a man, woman or child
skeleton	the network of bones inside the body
organ	part of your body that has a special job - heart, lungs
brain	the control centre for your body
senses	how your body learns about the world around you
sight	to be able to see
hearing	to be able to hear
smell	to be able to smell
touch	to feel things
taste	to use your tongue for flavour

Learning Objectives

- to name the human body parts
- to name the five senses
- to describe what each sense does
- to link the senses to the correct body parts
- to evaluate what it would be like to live without one of the senses.
